ASTHMA

Many cases of immediate relief and rapid-recovery from pronchial asthma of long standing and other diseases of throat and lungs are being credited to a discovery made by Dr. Eugene Howard of Worcester, Mass. Dr. Howard's prescription, which is totally different from all usual methods of treatment for these afflictions, is called Oxidaze and comes in the form of a tablet which the patient allows to disacte slowly in the mouth. Its curative, heating juices thus mingle with the sailra and enter every crevice of the irritated bronchial membranes, release the muscular constriction of the bronchial tubes, open up the air passages and regulate the apasmodic lung action. These tablets, though pleasant to the taste, are so powerful and rapid in their action that many users who for years were obliged to sit up in bed gasping for oreath and unable to sleep report that they now put a single Oxidaze tablet in their moath when going to bed and can then lie down and preathe easily and naturally and get a good night's restful sleep. Lee & Osgood and many other local drugg:sts who handle Oxidaze tablets sell it on the fit does not give immediate relief. BATON—In Norwich, Dec. 18, 1916, a daughter to Mr. and Mrs. Frederick E.
